

# ACCOUNTING

## Elective Learning Area

Digital  
Innovation

### Course Outline

Accounting is a universal discipline, encompassing the successful management of financial resources of the public sector, businesses and individuals. It is foundational to all organisations across all industries and assists in discharging accountability and financial control. Accounting is a way of systematically organising, critically analysing and communicating financial data and information for decision-making.

Accounting is for students with a special interest in business, commerce, entrepreneurship and the personal management of financial resources
